

Left Center Right

This is a party game; equivalent to a random lottery, where the likelihood of winning is inversely proportional to the total number of players. It is more enjoyable with bigger groups of somewhat loopy players.

Players

2+ minimum; 6+ recommended; no maximum

Equipment/Setup

- Three 6 sided dice
- Three chip bankroll for each player (or three single \$1 bills)

Turn

1. Roll one die for each chip in your hand; up to three maximum.
2. Each die rolled determines the fate of a single chip in your hand:
 - 1, 2, or 3:** safe; do nothing
 - 4:** pass chip left
 - 5:** add chip to pot
 - 6:** pass chip right
3. Pass the dice to the next player with at least one chip.

Game Completion

The game is over when only one player is left with chips.
